OVERVIEW OF MATERIALS DATA CURATION TOOLS WEBINAR SERIES

THIS EVENT IS FREE FOR TMS MEMBERS! If you are a TMS member, be sure to complete the online registration form in order to access the webinars at www.tms.org/DataWebinars.

SERIES OVERVIEW

This five-part webinar series will present an overview of a variety of recently developed materials data curation tools. An initial preview presentation will outline the advantages of data curation, discuss which types of tools work best for different situations, and review how these tools can work together. The following four webinars will each present an overview of specific data curation tools, all of which are open source.

Participants will also have the chance to interact with leading experts in the field, including the innovators of the various tools, during the interactive Q&A sessions held at the end of each live event. Learn more at www.tms.org/DataWebinars.
